With a few exceptions the illustrations were photographed from these copies." To the rear of the catalogue (copyright 1940) is a price list for 1948-1949; these prices are "subject to liberal dealer's discount." This uncommon booklet offers a detailed pictorial account of cabinetry hardware of high quality. \$ 60.00

[47357] FURNITURE AND ACCESSORIES) **Enduring Modern--Its Place In the Home of Today**

*Booklet, duo-toned illustrations, 7pp, 5 1/2 x 8 1/2 inches, pictorial paper wrappers. A couple of soft vertical creases; good, clean condition.*

Dunbar Furniture Manufacturing Company. Berne, Indiana. No date. Ca. 1939.

The booklet, with a substantial number of sepia illustrations, begins by posing the question: "What is Modern?" The answer is forthcoming: "Modern furniture design in the United States dates back a scant decade. In this short time Modern furniture has evolved from the crudities of the late 20's to the finely styled pieces shown in this booklet. Modern furniture reflects the spirit of our own times. The basic elements of all good furniture--graceful lines, pleasing proportions and fine craftsmanship--are present but with a sharper accent on usability and a reliance upon the intrinsic fineness of materials." Dunbar is, today, famous for the decades-long relationship with furniture designer Edward Wormley who joined the firm in 1931 after attending the Art Institute of Chicago and spending time in Paris, where he encountered the masterful furniture designs of Emile-Jacques Ruhlmann. To what extent Wormley contributed to the text of the Dunbar catalogue can never be known, but certainly the ideas correspond to Wormley's belief that "Modernism means freedom...." Pages two through five of the catalogue include a list of "Do's and Don'ts In Modern Decoration," which are referred to as "easy guides ... for the layman," e.g. "A piece of good pottery, a wood carving or a figure will do more to give your room distinction than a collection of cheap gadgets." The sepia illustrations feature living room, dining room and bedroom ensembles and various occasional pieces. The uncommon catalogue is in good condition and provides a clear idea of the scope and arresting simplicity of Dunbar's pre-war designs and their "Place in the Home of Today." \$ 225.00

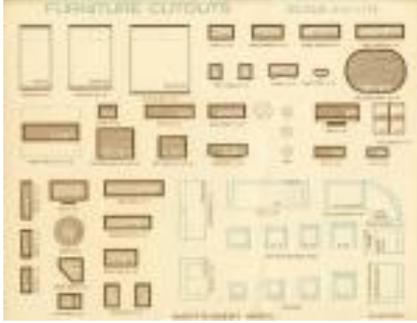

[47359] FURNITURE AND ACCESSORIES) **Imperial's Jefferson Group.**

*Booklet, black and white photo illustrations, 31pp, 5 3/4 x 8 1/2 inches, color decorative paper wrappers. Covers a trifle worn; very good, clean condition.*

Imperial Furniture Company. Grand Rapids, Michigan. No date. Ca. 1940.

A handsomely illustrated catalogue featuring furniture made from "genuine old fashioned solid mahogany." In the opening pages the manufacturer describes the nature of their product: "The gracious dignity and charm that characterized American life during the early period of our nation's history is reflected admirably in Imperial's new Jeffersonian group of authentic American occasional pieces. Included in this group are more than sixty aristocratic creations in a wide variety of appealing types which are adaptable to the requirements of the American home. ... They will contribute the traditional background and the atmosphere of culture and refinement so desirable in your home." Various individual pieces and room groupings are depicted, as well as guides to the arrangement of furniture. The booklet's folded paper wraps are especially attractive, and distinguish a pictorial catalogue in very good condition featuring a wide variety of traditional American furniture. \$ 85.00

Booklet, color illustrations, loose sheet of Furniture Cutouts and graph paper in rear pocket, unpaginated, 11 1/4 x 8 3/4 inches, color pictorial stiff paper wrappers. Very good, clean condition.

Montgomery Ward. Chicago. 1960.

Linked to a photo of a room furnished in one of these styles is a column entitled "Typicals" which lists Fabrics, Floor Coverings, Furniture Finishes, Accessories, etc., associated with each style. Brief discussions of Kitchen Planning and Bathroom Planning bring the booklet to a close. In a pocket on the interior of the rear cover is a printed grid (1/4 inch = 1 ft) and a page of perforated furniture cutouts (beds, tables, sofas, chairs etc.) drawn to the scale of the grid. The parameters of a room can be drawn on the grid and the furniture cutouts pushed around until a suitable design is achieved. Endless fun. Overall, a cheerful booklet in very good condition that fails to address the thorny issue of lampshades. \$ 40.00

[46395] INTERIOR FURNISHINGS CATALOG) **Furniture..Floor Coverings..Radios Ready to Ship from Oakland San Francisco Fresno-Sacramento. Catalog 174-175. 1930-31. Peck & Hills Furniture Company Wholesale Furniture and Floor Coverings.**

The featured kitchens are designed with specific (female) domestic activities in mind, e.g. "Where the laundry does itself" or "If canning is your hobby." Overall, a booklet in very good condition featuring an engaging collection of mid-century kitchens accented with bold color palates. \$ 40.00

[47297] MILLWORK) **Today's Idea House. New Views...New Pointers on increasing Home Comfort, Convenience and Beauty with Ponderosa Pine Woodwork.**

*Booklet, black and white photo illustrations throughout, 28pp, 8 1/2 x 11 inches, color pictorial cover wrappers. Light wear to covers, soft bump to upper right corner, pencil notation on single page, mid section loose; otherwise good, clean condition.*

Ponderosa Pine Woodwork. Chicago. Copyright 1945.

A profusely illustrated booklet featuring doors, windows, storm sash and screens, closets and more, manufactured from ponderosa pine. In the Preface, "Welcome to Today's Idea House," we are informed the manufacturer conceives "of doors, windows and woodwork in terms of what they can DO to help you realize your ambition in the home you are about to build or remodel." In depicting home interiors, the booklet captures a great deal more than the extensive variety of door and window designs available, for it places these items in the context of room decor. Fashionable post-war interiors are pictured throughout the booklet. However, without intending to do so, an oxymoron is employed that reveals a serious hazard embedded in the various pine products: "today, thanks to modern scientific research, wood is better, more lasting, than ever! For today, wood can be impregnated with chemicals to give it greater resistance to decay and change-producing fungi. Such treatment, known as toxic preservation, adds an extra measure of durability to wood's unequalled beauty, endurance, utility and economy." On the rear jacket the reader is informed that "More than any other of your possessions, your home should express your individuality, your tastes, your preferences in living...." Surely a homeowner with "preferences in living" could not be faulted for giving products enhanced through "toxic preservation" a wide berth. \$ 45.00

[47305] PLUMBING AND HEATING) **An Authoritative Catalogue of Plumbing Fixtures for Every Need, Code and Standard of Equipment.**

*Five ring binder, black and white photo illustrations, color tab illustrations, 262+130+62pp, 10 x 8 1/2 inch gilt lettered faux-leather binder. Binder lightly worn; ink and pencil notations to title page and a few additional pages, occasional "x" ink mark, good, clean condition.*

The indexed ring binder contains specifications and color and black and white illustrations detailing the vast inventory of fixtures and accessories manufactured and sold by American Radiator and Standard Sanitary Corporation. The inserts describing specific products are dated at the bottom right, with some stating they replace similar pages of an earlier date. Thus we have wide ranging dated material, spanning more than a decade. Fixtures on some pages are X'd over, indicating a discontinued line, while glossy colored inserts promote a vision of the installed plumbing and heating units. This uncommon catalogue provides a comprehensive view of mid-20th century plumbing and heating equipment in a lavishly illustrated format. \$ 245.00

Port Orford Cedar Products Co. Marshfield, OR. Copyright 1930.

This small booklet features, on every other page, sepia photographs of various well appointed rooms, many identified as being New York City apartments, in which venetian blind window treatments are employed. The title page states the booklet is one "of practical suggestions for shading windows with Venetian Blinds, and for curtaining and draping them; prepared with the assistance of Margaret McElroy, Authority on Interior Decoration, New York City. Further in the booklet, the cachet ascribed to the venetian blinds is appealed to: "their enduring charm and pleasant individuality together with the perfect manner in which they control light and ventilation are winning for Venetian Blinds an entree into the finest homes in America." Noteworthy is the fact that the blinds featured in this booklet are made from cedar: "Permeated with natural preservative oils, this wood endures for generations.... Finely, evenly grained, it never warps, twists, checks or splinters. Cream-white, satin smooth, it takes lacquer, stain or enamel easily...."
